

Demand for PunchOut-enabled catalogs and storefronts continues to grow. As with all technology, that growth carries with it greater complexities and variations, as new users demand ever greater functionality. The knowledge and skills required to meet these demands continues to grow proportionately. You need a partner who is up to the challenge.

Enterprise-Connect provides the universal PunchOut connectivity you need to leverage your existing storefront. Acting as a middleware, Enterprise-Connect removes the complexity of PunchOut...we'll handle it for you as you focus on your core competencies.

Universal PunchOut Connectivity

The choice: build, outsource or collaborate

Perhaps you have functionality in your website that can't be duplicated. Or you're frequently changing data means you'd rather have a single data repository. These are good reasons to leverage your own web storefront for PunchOut. However, do you want your web programmer to spend 6 months learning a new language and protocol? And then rely on them to stay up to date on the changes to PunchOut protocols and technology? What if your programmers learn cXML, then your next customer is using OAGxml?

If you'd rather have your programmers focus on internal projects you already have for your storefront, then Enterprise-Connect is the application for you. Let us handle the PunchOut technologies...we're the experts. Our team is focused on PunchOut, with over 1100 PunchOut integrations completed.

Punchout Compatibility Assurance™

You'll always be connected. When your customer upgrades their purchasing system, we'll upgrade your system to maintain compatibility – no questions asked!

We have collected a wealth of knowledge over the years and we put it to good use. Your customer will have continuous access to a Test PunchOut system and our knowledgeable staff, so when they are ready to upgrade – it's our team that provides them the facilities and feedback they need to ensure a successful upgrade.

PunchOut Ready® certified

You can be confident that you've made a wise choice. Compatible with over 28 different Purchasing solutions, Enterprise-Connect is the right choice today and into the future.

Today you have a customer using Ariba. But what about the next customer that's using Oracle, or PeopleSoft, or eschoolMall, or Purchase Pro? Why take chances? Start off with a solution that can handle them all, and adds new integration modules regularly.

Enterprise-Connect. The right choice.

Benefits
