

BAASS Business Solutions:
where business needs meet technology.

Who We Are

Since 1988, we've been successfully providing accounting and business management solutions to companies of all types and sizes throughout North America and the Caribbean. Today, we have 21 offices with over 90 business analysts, consultants and developers to help you improve your business processes to become more profitable.

With an experienced team of business application, IT, and design consultants, BAASS offers a comprehensive range of services including requirements analysis, management consulting, system design, HRMS, BI, configuration, software training and technical support in accounting, ERP, CRM, e-business, custom solutions, and cloud solutions.

Most of our prospects and clients come to us through referrals from people who know our reputation for expertise, professionalism, and integrity. They know we can offer, implement, and support an end-to-end solution that will work now, and in the long term.

If you ask our customers, you'll get a consistent message on why they do business with us. For many, it's our customer centric approach to business. For others, it's our integrity, 25+ years in business, our team's extensive knowledge, or our North American scalability while maintaining a nimble specialized approach to understanding our customers' businesses. Either way, our marketing, sales, consulting, and quality control are all designed and executed with one person in mind – our valued customer.

Solutions Provided:

- ERP
- CRM
- BI
- HRMS
- WMS
